3. Other Business

a. Admission of students on Academic Suspension in other faculties

Recently two students who were "required to withdraw" from Pharmacy applied for admission to Science. The Dean's office found that the Faculty of Arts does not admit students who are on suspension from other faculties for at least one year.

The question was whether Science wanted to apply the same restriction and how to do it. Ms. Johannson thought it could be approved by Faculty Council and referred to Senate for information. The Dean felt the Executive could recommend it to Faculty Council and could in the interim apply it by means of a motion of the Executive.

It was moved by Hunter (Paul) that the Executive recommend to Faculty Council "The Faculty of Science establish a policy of not admitting students who are on academic suspension from another faculty"

With the agreement of the proposer and seconder, an amendment was moved by Arnason (Feigelman) to add the words "during the first year of academic suspension."

Sharma asked if there were reasons other than academic for suspension. The dean responded that there are also reasons of discipline and of professional unsuitability. The latter is before Senate at present.

The vote was taken and the motion as amended was

CARRIED

It was moved by Arnason (Hunter) that "The faculty institute a procedure in the interim until the recommendation is brought to Faculty Council."

CARRIED

b. Graduate Program in Imaging and Remote Sensing

This proposal from the Working Group on Imaging and Remote Sensing had been tabled at the last meeting because of concerns by the Department of Computer Science. The Department had prepared a report, which was circulated to members.

It was agreed that the Computer Science report would be sent to those members not present at this meeting and they be advised that it will be considered at a future meeting, possibly later in June.

There being no further business the meeting adjourned.
